To An encoding bile salt-stimulated lipase/carboxyl ester l substitute, contains intron sequences

Claim 1; Page 43-51; 76pp; English.

C The primers (Q54223-28) are used to amplify fragments of lipase which when expressed by the sanimals can be used as a human milk substitute. The BSSL Can be used as a human milk substitute. The BSSL As it has a broad substrate specificity it can mediate th Sequence lissible salt-stim of sequence lissible salt-stim the small digestion of most dietary lipids.

Sequence lissible salt-stim sequence salt-stim the small digestion of most dietary lipids.

PT New isolated fungal pathogenicity genes

CC claim 33; Page 47-49; SOpp; English.

CC designated PTH2, PTH3, PTH11 and PTH12 that are obtained from Magnapartha

CC grisea. These novel genes encode proteins (Y06783-86) that are highly

CC imidazole glycerol phosphate dehydratase enzyme, fungal

CC associated pathogenicity protein or fungal homeodomean transcription

CC pathogenicity. Inhibition of any of the genes PTH2, PTH3, PTH11 and PTH12

CC results in the reduction or elimination of the pathogenic phenotype of

CC identify inhibitors of the fungal pathogenic gene products. The solated genes are useful in the design of screens to

CC sequence represents the PTH12 gene sequence.

Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP) The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial

Determination of this BAC-end sequence was carried out as part of collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk -. This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton pagelobacli.

Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial ECORI digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2; cn bw sp, the same strain used for the BDGP's and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://bacpac.med.buffalo.edu/drosophila_bac.htm.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                91
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    TSTBI
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   gugugcccacaccgcgcgcuugcgaauaauacuuuggagagucuuuugccuccaguguc

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Match
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               S
                                                   - Web: www.genoscope.cns.fr)

Determination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila melanogaster BAC library was prepared by Kazutoyo Osoegawa and Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, NY. The library is named RPCI-98 and was constructed by partial EcoRI digestion of Drosophila DNA provided by the BDGP from the isogenic strain y2; cn bw sp, the same strain used for the BDGP's pl and EST libraries. A more detailed description of the library and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be found at http://haronac.mod.buffslo.adu/Aronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.bac.haronachila.ba

Determination of this BAC-end sequence was carried out as part of collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk -. This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton and Genevieve Payan. It has been constructed in the vector
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       fly), genomic;

Determination of this BAC-end sequence was carried out as part of a Collaboration with the Berkeley Drosophila Genome Project (BDGP).
The BDGP is constructing a physical map of the Drosophila please see http://www.fruitfly.org The BDGP Drosophila please see http://www.fruitfly.org The BDGP Drosophila Aaron Mammoser in Pieter de Jong's laboratory in the Department of Cancer Genetics at the Roswell Park Cancer Institute in Buffalo, EcoRI digestion of Drosophila DNA provided by the BDGP from the pland EST libraries. A more detailed description of the BDGP's and how to order individual BAC clones, the entire library, or filters for hybridization from the BACPAC Resource Center can be Location/Qualifiers

Determination of this BAC-end sequence was carried out as part of collaboration with the European Drosophila Genome Project (EDGP) - thtp://www.edgp.ebi.ac.uk -. This Drosophila melanogaster BAC http://www.edgp.ebi.ac.uk - This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton and Genevieve Payan. It has been constructed in the vector
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Genoscope.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          petermination of this BAC-end sequence was carried out as part of a collaboration with the Berkeley Drosophila Genome Project (BDGP). The BDGP is constructing a physical map of the Drosophila melanogaster genome using these BACs. For further information please see http://www.fruitfly.org The BDGP Drosophila of melanogaster BAC library was prepared by Kazutoyo Osoegawa and melanogaster BAC library was prepared by Kazutoyo Osoegawa and was ronstructed by the Department of Aaron Mammoser in Pieter de Jong's Laboratory in the Department of Ny. The library is named RPCI-98 and was constructed by partial NY. The library is named RPCI-98 and was constructed by partial sogenic strain of Drosophila DNA provided by the BDGP from the EcoRI digestion of Drosophila DNA provided by the BDGP from the pland is strain y2; cn bw sp, the same strain used for the BDGP's is sogenic strain y2; cn bw sp, the same strain used for the BDGP's is not be provided description of the library or and how to order individual BAC clones, the entire library, or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the entire library or and how to order individual BAC clones, the BACPAC Resource Center can be filters for hybridization from the BACPAC Resource Center can be location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               61

Determination of this BAC-end sequence was carried out as part of collaboration with the European Drosophila Genome Project (EDGP) - http://www.edgp.ebi.ac.uk -. This Drosophila melanogaster BAC library (Dros BAC) was made by Alain Billaud at CEPH (Centre d'Etude du Polymorphisme Humain) with funding provided by a MRC project grant. The DNA was prepared from embryos by Alain Bucheton and Genevieve Payan. It has been constructed in the vector
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              o 10.8%; Similarity 20.6%; 14; Conservative
